1 Professional Summary

Software Engineer with over 5 years of experience in DevOps and software integration. Loves to design and optimize CI/CD pipelines and scalable solutions.

2 Work Experience

2.1 Amadeus, Software Engineer/DevOps

Villeneuve-Loubet, France

Jun 2022 – Present

- Develop PaaS solutions for airlines (Qatar Airways, Etihad, Air Canada) and contribute to EONA-X dataspace for secure data exchange within the European Union.
- Optimize CI/CD pipelines using Groovy, Python, Bash, and GitHub Actions, improving deployment efficiency by 40%.
- Build automation/monitoring tools with Terraform, Java, and PostgreSQL, reducing operational overhead.
- Monitor platforms with Grafana/Prometheus, ensuring uptime, and manage secure configurations with Azure APIM and Azure KeyVault.
- Migrate systems to Azure using Kubernetes, OpenShift, and Helm.

2.2 Netcompany - INTRASOFT International, Software Integration Engineer

Patras, Greece

Apr 2020 – Jun 2022

- Delivered Java solutions on Oracle Fusion Middleware for Vodafone/OTE, improving workflows.
- Built SOAP/REST services with JDeveloper, XML, XSLT, ensuring zero-defect releases.
- Provided 24/7 production support, resolving issues within SLAs.

2.3 Visualization & Virtual Reality Group, University of Patras, Software/VR-AR Engineer

Patras, Greece

Dec 2019 – Jun 2022

- Developed Unity3D (C#) vehicle simulation with haptic feedback for EU Trustonomy project.
- Built AR rendering for HoloLens 2 in CPSOS EU project.
- Created RESTful APIs for VR integration in AGEING@WORK EU project.
- Secured finalist positions in IEEE VR 3DUI contests (2020–2022).

2.4 KapaKorifi - Kapalearn, Teaching Assistant (Freelancer)

Patras, Greece

Mar 2020 – Dec 2021

- Tutored Python, C#, Unity3D, boosting student project completion.
- Graded Java assignments, providing constructive feedback.

3 Education

3.1 University of Patras, Diploma (BSc & MSc), Electrical and Computer Engineering

Patras, Greece

Oct 2013 – Feb 2020

- Thesis: Brain-Computer Interface for movement support devices.
- Specialization: Software Development, VR/AR, Automation Control.

4 Skills

- **Programming:** Python, Groovy, C#, Bash, Java, MATLAB
- **DevOps & Cloud:** Kubernetes, Docker, Helm, Azure, Azure APIM, Azure KeyVault, OpenShift, Terraform, GitHub Actions, CI/CD
- **Databases:** PostgreSQL
- **VR/AR Tools:** Unity3D, Blender3D, OpenGL
- **Other Tools:** Git, SVN, JDeveloper, Photoshop, SPSS
- **Languages:** Greek (Native), English (C2), German (B1), French (B1)

5 Achievements

- 2023: Published *Machine Journal* paper on human-robot collision risk (Basel, CH).
- 2022: IEEE VR 3DUI Finalist, *ArtScape* VR (Christchurch, NZ).
- 2021: IEEE VR 3DUI Finalist, *Dr.supER* VR (Virtual).
- 2020: IEEE VR 3DUI Finalist, *VR Schizophrenia Simulation* (Atlanta, US).
- 2019: IEEE Hackathon Br41n.IO Winner, *Braincraft* BCI (Athens, GR).
